In Fall 2019, UAF launched the Alaska Advantage program to provide Alaska’s high-achieving high school students an in-state, high-quality and affordable option for dual enrollment. Through this Virtual Middle College program they can enroll in real online college courses and earn both high school and college credit.
STUDENT SUCCESS

High school students in the Alaska Advantage program had an 89% success rate in Fall 2019 and a 96% success rate in Spring 2020. Student success is measured as the number of students who completed the course and earned a C- or better (including P, CR, and NG grades, not including W, I or DF).

UAF eCampus has built a robust support system for these students, including:

- A website: ecampus.uaf.edu/advantage
- Online orientations
- One-on-one support for choosing courses and other questions
- A dedicated registration process
- Email and phone check-ins throughout the semester

Additionally, UAF instructors are notified at the beginning of the semester if an Alaska Advantage high school student is enrolled in their course and student-selected observers (typically their high school teacher or counselor) are added to the course in Blackboard so that the students can easily receive support from those they already have a relationship with.

MOST POPULAR COURSES

- Writing Across Contexts (WRTG F111X)
- College Algebra for Calculus (MATH F151X)
- Introduction to Psychology (PSY F101X)
- Trigonometry (MATH F152X)
- Calculus I (MATH F251X)
